Sharpened axes and knives are the oldest hand tools known to man. As the author says, “I have come to recognize that there is an enormous lack of understanding and skill in using hand tools....This, along with a realization of the close relationship between hand tools and the keen sense of design that was our forefathers’, has prompted me to write this book.” *Swedish Carving Techniques* brings a new appreciation of this age-old craft and how working with knives and axes fits into today's high-tech world.
