Marine Microbiology: Bioactive Compounds and Biotechnological Applications

Marine Microbiology: Bioactive Compounds and Biotechnological Applications

Deliberately breaking with the classical biology-centered description of marine organisms and their products, this reference emphasizes microbial technology over basic biology, setting it apart from its predecessors. As such, it systematically covers the technology behind high-value compounds for use as pharmaceuticals, nutraceuticals or cosmetics, from prospecting to production issues.

Following a definition of the field, the book goes on to address all industrially important aspects of marine microbial biotechnology. The first main part contains a description of the major production organisms, from archaeobacteria to cyanobacteria to algae and symbionts, including their genetic engineering. The remaining four parts look at commercially important compounds produced by these microorganisms together with their applications. Throughout, the emphasis is on technological considerations, and the future potential of these organisms or compound classes is discussed. A valuable and forward-looking resource for innovative biotechnologists in industry as well as in academia.

From reader reviews:

Michael Cardona:

Reading can called mind hangout, why? Because when you are reading a book especially book entitled Marine Microbiology: Bioactive Compounds and Biotechnological Applications your mind will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will become your mind friends. Imaging just about every word written in a e-book then become one web form conclusion and explanation in which maybe you never get just before. The Marine Microbiology: Bioactive Compounds and Biotechnological Applications giving you yet another experience more than blown away the mind but also giving you useful info for your better life in this particular era. So now let us present to you the relaxing pattern the following is your body and mind will likely be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Gina Keller:

Is it an individual who having spare time and then spend it whole day by watching television programs or just laying on the bed? Do you need something totally new? This Marine Microbiology: Bioactive Compounds and Biotechnological Applications can be the answer, oh how comes? The new book you know. You are so out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these guides have than the others?

Edna Davis:

Reserve is one of source of know-how. We can add our expertise from it. Not only for students but native or citizen need book to know the upgrade information of year to be able to year. As we know those publications have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book Marine Microbiology: Bioactive Compounds and Biotechnological Applications we can get more advantage. Don't someone to be creative people? To become creative person must like to read a book. Just choose the best book that suitable with your aim. Don't end up being doubt to change your life with this book Marine Microbiology: Bioactive Compounds and Biotechnological Applications. You can more desirable than now.

Douglas Brim:

Some people said that they feel bored stiff when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose the actual book Marine Microbiology: Bioactive Compounds and Biotechnological Applications to make your personal reading is interesting. Your personal skill of reading skill is developing when you including reading. Try to choose very simple book to make you enjoy to learn it and mingle the sensation about book and looking at especially. It is to be first opinion for you to like to available a book and go through it. Beside that the e-book Marine Microbiology: Bioactive Compounds and Biotechnological Applications can to be your brand new friend when you're experience

alone and confuse in what must you're doing of these time.
