Global History: A View from the South Samir Amin

Responding to the need to take a fresh look at world history, hitherto dominated by Eurocentric ideologues and historians in their attempt to justify the nature and character of modern capitalism, Samir Amin looks in this book at the ancient world system and how it has influenced the development of the modern world. He analyses the origin and nature of modern globalization and the challenges it presents in achieving socialism and examines the role played by Central Asia in determining the course of world history as well as the different roads taken by Europe and China. The book looks closely at a theme that has been primordial to his contribution to political and economic thought: the question of unequal development.
