Robust Cluster Analysis and Variable Selection (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Gunter Ritter

Clustering remains a vibrant area of research in statistics. Although there are many books on this topic, there are relatively few that are well founded in the theoretical aspects. In **Robust Cluster Analysis and Variable Selection**, Gunter Ritter presents an overview of the theory and applications of probabilistic clustering and variable selection, synthesizing the key research results of the last 50 years.

The author focuses on the robust clustering methods he found to be the most useful on simulated data and real-time applications. The book provides clear guidance for the varying needs of both applications, describing scenarios in which accuracy and speed are the primary goals.

Robust Cluster Analysis and Variable Selection includes all of the important theoretical details, and covers the key probabilistic models, robustness issues, optimization algorithms, validation techniques, and variable selection methods. The book illustrates the different methods with simulated data and applies them to real-world data sets that can be easily downloaded from the web. This provides you with guidance in how to use clustering methods as well as applicable procedures and algorithms without having to understand their probabilistic fundamentals.

From reader reviews:

Karon Hall:

In this 21st one hundred year, people become competitive in each and every way. By being competitive currently, people have to do something to make them survive, being in the middle of the crowded place and notice by surrounding. One thing that often many people have underestimated that for a while is reading. Yeah, by reading a reserve your ability to survive increase then having chance to stand than other is high. To suit your needs who want to start reading a book, we give you this kind of Robust Cluster Analysis and Variable Selection (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) book as basic and daily reading e-book. Why, because this book is more than just a book.

Gale Taylor:

Information is provisions for people to get better life, information nowadays can get by anyone from everywhere. The information can be a know-how or any news even an issue. What people must be consider whenever those information which is within the former life are difficult to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen inside you if you take Robust Cluster Analysis and Variable Selection (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) as your daily resource information.

Joyce Burke:

In this particular era which is the greater man or woman or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple solution to have that. What you have to do is just spending your time not much but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is Robust Cluster Analysis and Variable Selection (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). This book and that is qualified as The Hungry Inclines can get you closer in turning into precious person. By looking upward and review this e-book you can get many advantages.

Shelly Reder:

What is your hobby? Have you heard that will question when you got college students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you know that little person like reading or as reading through become their hobby. You need to understand that reading is very important along with book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them is actually Robust Cluster Analysis and Variable Selection (Chapman & Hall/CRC Monographs on Statistics & Applied Probability).
