Loss Models: Further Topics (Wiley Series in Probability and Statistics) Stuart A. Klugman, Harry H. Panjer, Gordon E. Willmot

An essential resource for constructing and analyzing advanced actuarial models

Loss Models: Further Topics presents extended coverage of modeling through the use of tools related to risk theory, loss distributions, and survival models. The book uses these methods to construct and evaluate actuarial models in the fields of insurance and business. Providing an advanced study of actuarial methods, the book features extended discussions of risk modeling and risk measures, including Tail-Value-at-Risk.

Loss Models: Further Topics contains additional material to accompany the Fourth Edition of *Loss Models: From Data to Decisions*, such as:

- Extreme value distributions
- Coxian and related distributions
- Mixed Erlang distributions
- Computational and analytical methods for aggregate claim models
- Counting processes
- Compound distributions with time-dependent claim amounts
- Copula models
- Continuous time ruin models
- Interpolation and smoothing

The book is an essential reference for practicing actuaries and actuarial researchers who want to go beyond the material required for actuarial qualification. *Loss Models: Further Topics* is also an excellent resource for graduate students in the actuarial field.

From reader reviews:

Maria Macdonald:

Nowadays reading books become more than want or need but also turn into a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining like comic or novel. The Loss Models: Further Topics (Wiley Series in Probability and Statistics) is kind of book which is giving the reader erratic experience.

Richard Forbes:

Hey guys, do you really wants to finds a new book you just read? May be the book with the headline Loss Models: Further Topics (Wiley Series in Probability and Statistics) suitable to you? The particular book was written by well known writer in this era. Typically the book untitled Loss Models: Further Topics (Wiley Series in Probability and Statistics)is the one of several books this everyone read now. This kind of book was inspired many men and women in the world. When you read this reserve you will enter the new dimension that you ever know prior to. The author explained their thought in the simple way, therefore all of people can easily to understand the core of this guide. This book will give you a lot of information about this world now. To help you to see the represented of the world in this book.

Breanne Gardner:

Beside this kind of Loss Models: Further Topics (Wiley Series in Probability and Statistics) in your phone, it could give you a way to get closer to the new knowledge or details. The information and the knowledge you may got here is fresh through the oven so don't always be worry if you feel like an outdated people live in narrow community. It is good thing to have Loss Models: Further Topics (Wiley Series in Probability and Statistics) because this book offers to you personally readable information. Do you occasionally have book but you do not get what it's about. Oh come on, that won't happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Use you still want to miss the idea? Find this book as well as read it from right now!

Betty Bass:

Is it anyone who having spare time and then spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Loss Models: Further Topics (Wiley Series in Probability and Statistics) can be the answer, oh how comes? It's a book you know. You are therefore out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
