## **An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences)**

George Henry Dunteman, Moon-Ho R. Ho

Do you have data that is not normally distributed and don't know how to analyze it using generalized linear models (GLM)? Beginning with a discussion of fundamental statistical modeling concepts in a multiple regression framework, the authors extend these concepts to GLM and demonstrate the similarity of various regression models to GLM. Each procedure is illustrated using real life data sets. The book provides an accessible but thorough introduction to GLM, exponential family distribution, and maximum likelihood estimation; includes discussion on checking model adequacy and description on how to use SAS to fit GLM; and describes the connection between survival analysis and GLM. It is an ideal text for social science researchers who do not have a strong statistical background, but would like to learn more advanced techniques having taken an introductory course covering regression analysis.

**From reader reviews:**

**Mary Gines:**

This An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is information inside this reserve incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This kind of An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences) without we recognize teach the one who studying it become critical in considering and analyzing. Don't possibly be worry An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences) can bring any time you are and not make your handbag space or bookshelves' turn out to be full because you can have it in your lovely laptop even mobile phone. This An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences) having excellent arrangement in word and also layout, so you will not really feel uninterested in reading.

**Janet Warren:**

People live in this new time of lifestyle always try to and must have the extra time or they will get great deal of stress from both daily life and work. So , if we ask do people have spare time, we will say absolutely indeed. People is human not a robot. Then we ask again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, the book you have read will be An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences).

**Brenda Moulton:**

You could spend your free time you just read this book this e-book. This An Introduction to Generalized Linear Models: 145 (Quantitative Applications in the Social Sciences) is simple to bring you can read it in the recreation area, in the beach, train in addition to soon. If you did not get much space to bring the printed book, you can buy the particular e-book. It is make you easier to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

**Karen Johnson:**

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this An Introduction to Generalized Linear Models: 145 (Quantitative

Applications in the Social Sciences) can make you experience more interested to read.
