This study provides a representation of the broad spectrum of theoretical work on topics related to business ethics, with a particular focus on corporate citizenship. It considers relations of business and society alongside social responsibility and moves on to examine the historical and systemic foundations of business ethics, focusing on the concepts of social and ethical responsibilities. The contributors explore established theories and concepts and their impact on moral behaviour. Together, the contributions offer varied philosophical theories in approaches to business ethics. The book will be a valuable resource for academics and researchers with an interest in the theoretical development of business ethics.
