Childhood: Second edition (Key Ideas) David Bohm

In this book Chris Jenks looks at what the ways in which we construct our image of childhood can tell us about ourselves. After a general discussion of the social construction of childhood, the book is structured around three examples of the way the image of the child is played out in society:

- the history of childhood from medieval times through the enlightenment 'discovery' of childhood to the present
- the mythology and reality of child abuse and society's response to it
- the 'death' of childhood in cases such as the James Bulger murder in which the child itself becomes the perpetrator of evil.

Part of the highly successful *Key Ideas* series, this book gives students a concise, provocative insight into some of the controlling concepts of our culture.
