**Scientific Progress (Routledge Library Editions: 20th Century Science)** James Jeans, William Bragg, E.V. Appleton, E. Mellanby, J.B.S. Haldane, Julian S. Huxley

First published in 1936, this volume contains six of the Halley Stewart Lectures – originally founded "For Research towards the Christian Ideal in All Social Life" – by some of the greatest of English scientists of the mid-20<sup>th</sup> century, each a leading authority in his respective field: cosmology, physics, meteorology, medicine and genetics.

The final lecture considers the relationship between scientific knowledge and human ideals, commenting on the paradox that a century which produced such scientific advance also witnessed the most concentrated period of social, economic and political turmoil in world history.
