Science Sifting: Tools for Innovation in Science and Technology

Rodney R Dietert, Janice Dietert

Science Sifting: Tools for Innovation in Science and Technology Rodney R Dietert, Janice Dietert

Science Sifting is designed primarily as a textbook for students interested in research and as a general reference book for existing career scientists. The aim of this book is to help budding scientists broaden their capacities to access and use information from diverse sources to the benefit of their research careers.

The book describes why the capacity to access and integrate both linear and nonlinear information has been an important historic feature of pivotal scientific breakthroughs. Yet, it is a process that our students are rarely, if ever, taught in universities. This book goes beyond simply describing the features of great scientific breakthroughs. It discusses the basis for accessing and using nonlinear information in the linear research context. It also provides a series of tools and exercises that can be used to enhance access to nonlinear information for application to research and other endeavors.

Topics covered include focal points in scientific breakthroughs, the use of concepts maps in research, use of different vantage points, information as patterns, fractals for the scientist, memory storage and access points, and synchronicities. Young researchers need useful tools to help with a more holistic approach to their research careers. This book provides the useful tools to support flexibility and creativity across a long-term research career.

Roald Hoffmann — Winner of the 1981 Nobel Prize in Chemistry — has contributed the Foreword to *Science Sifting*. More information on Professor Hoffmann can be found at http://www.nobelprize.org/nobel_prizes/chemistry/laureates/1981/hoffmann-autobio.html.

Contents:

- Introduction and Orientation to Science Sifting
- Duality and the Creative Scientist
- Moments of Scientific and Technological Discovery
- Preparing for a Fulfilling Research Career
- Informational Patterns
- Focus on Creativity and Innovation
- Mind Your Language
- Perceiving Your Reality
- Body of Work: Managing Your Greatest Tool
- Creative Spaces
- Vantage Points and Gaining Multiple Perspectives
- Mapping Information Terrains
- Pattern Jumping and Lateral Thinking
- Synchronicity
- Sandman Science: Science Sifting During Sleep
- Meditation: Ohming Up or Getting Down with the Real You?
- The Neutral Observer: Letting Go of Drama, Ego, and Attachments
- Play Like You Mean It
- Striking a Chord of Creativity: The Art of Science

- Summing it Up
- References

Readership: Professional scientists, students and young researchers.

From reader reviews:

Heather Goodson:

What do you about book? It is not important along? Or just adding material when you require something to explain what the ones you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question since just their can do this. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this specific Science Sifting:Tools for Innovation in Science and Technology to read.

Milton Jones:

A lot of people always spent their free time to vacation or perhaps go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day every day to reading a publication. The book Science Sifting:Tools for Innovation in Science and Technology it is rather good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to develop this book you can buy the actual e-book. You can m0ore easily to read this book from the smart phone. The price is not to cover but this book has high quality.

Bobby House:

Beside this particular Science Sifting:Tools for Innovation in Science and Technology in your phone, it could give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh from your oven so don't always be worry if you feel like an outdated people live in narrow small town. It is good thing to have Science Sifting:Tools for Innovation in Science and Technology because this book offers for your requirements readable information. Do you often have book but you don't get what it's all about. Oh come on, that won't happen if you have this in your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss it? Find this book in addition to read it from now!

Michael Hansen:

That publication can make you to feel relax. This particular book Science Sifting:Tools for Innovation in Science and Technology was multi-colored and of course has pictures on the website. As we know that book Science Sifting:Tools for Innovation in Science and Technology has many kinds or style. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it makes you feel happy, fun

and relax. Try to choose the best book for you and try to like reading this.
