## **Iontronics: Ionic Carriers in Organic Electronic Materials and Devices**

The field of organic electronics promises exciting new technologies based on inexpensive and mechanically flexible electronic devices, and is now seeing the beginning of commercial success. On the sidelines of this increasingly well-established field are several emerging technologies with innovative mechanisms and functions that utilize the mixed ionic/electronic conducting character of conjugated organic materials.

**Iontronics: Ionic Carriers in Organic Electronic Materials and Devices** explores the potential of these materials, which can endow electronic devices with unique functionalities.

### *Fundamental science and applications*

With contributions from a community of experts, the book focuses on the use of ionic functions to define the principle of operation in polymer devices. It begins by reviewing the scientific understanding and important scientific discoveries in the electrochemistry of conjugated polymers. It examines the known effects of ion incorporation, including the theory and modulation of electrochemistry in polymer films, and it explores the coupling of electronic and ionic transport in polymer films. The authors also describe applications that use this technology, including polymer electrochromic devices, artificial muscles, light-emitting electrochemical cells, and biosensors, and they discuss the fundamental technological hurdles in these areas.

The changes in materials properties and device characteristics due to ionic conductivity and electrochemical doping in electrically conductive organic materials, as well as the importance of these processes in a number of different and exciting technologies, point to a large untapped potential in the development of new applications and novel device architecture. This volume captures the state of the science in this burgeoning field.

### **From reader reviews:**

#### **Joanna Weekley:**

The book Iontronics: Ionic Carriers in Organic Electronic Materials and Devices will bring you to definitely the new experience of reading a new book. The author style to elucidate the idea is very unique. In case you try to find new book you just read, this book very acceptable to you. The book Iontronics: Ionic Carriers in Organic Electronic Materials and Devices is much recommended to you to see. You can also get the e-book in the official web site, so you can easier to read the book.

#### **Samuel Rascon:**

The reason why? Because this Iontronics: Ionic Carriers in Organic Electronic Materials and Devices is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will shock you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such incredible way makes the content inside easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This amazing book will give you a lot of advantages than the other book get such as help improving your ability and your critical thinking way. So , still want to hesitate having that book? If I were being you I will go to the book store hurriedly.

#### **Philip Edwards:**

That guide can make you to feel relax. This kind of book Iontronics: Ionic Carriers in Organic Electronic Materials and Devices was vibrant and of course has pictures on the website. As we know that book Iontronics: Ionic Carriers in Organic Electronic Materials and Devices has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore not at all of book are generally make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading which.

#### **Christina Pena:**

What is your hobby? Have you heard that will question when you got students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person including reading or as examining become their hobby. You need to understand that reading is very important and book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is actually Iontronics: Ionic Carriers in Organic Electronic Materials and Devices.
