Coming to Peace with Science: Bridging the Worlds Between Faith and Biology Darrel R. Falk

Is a thoroughly Christian and biblically informed doctrine of creation compatible with widely held conclusions of modern science, especially biology?

For Darrel R. Falk, this is not just an abstract question but one with which he has personally wrestled. A professor of biology, Falk brings together his biblically based understanding of creation and the most current research in biology. The result of his efforts to acknowledge the validity of science and the authority of Scripture is a new paradigm for relating the claims of science to the truths of Christianity.

Written with the undergraduate student in mind, this book nonetheless will help anyone who is looking for a place to stand in the creation-evolution debate, fearful that they'll have to choose between intellectual integrity and the faith of the church. Calling for charitable discussions within the church, Falk shows how an original and ongoing interaction of God with creation is fully reconcilable with the kinds of development identified by current biological science.
