Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications Jing (Selina) He, Mr. Shouling Ji, Yingshu Li, Yi Pan

Although wireless sensor networks (WSNs) have been employed across a wide range of applications, there are very few books that emphasize the algorithm description, performance analysis, and applications of network management techniques in WSNs. Filling this need, **Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications** summarizes not only traditional and classical network management techniques, but also state-of-the-art techniques in this area.

The articles presented are expository, but scholarly in nature, including the appropriate history background, a review of current thinking on the topic, and a discussion of unsolved problems. The book is organized into three sections. Section I introduces the basic concepts of WSNs and their applications, followed by the summarization of the network management techniques used in WSNs.

Section II begins by examining virtual backbone-based network management techniques. It points out some of the drawbacks in classical and existing methods and proposes several new network management techniques for WSNs that can address the shortcomings of existing methods. Each chapter in this section examines a new network management technique and includes an introduction, literature review, network model, algorithm description, theoretical analysis, and conclusion.

Section III applies proposed new techniques to some important applications in WSNs including routing, data collection, data aggregation, and query processing. It also conducts simulations to verify the performance of the proposed techniques. Each chapter in this section examines a particular application using the following structure: brief application overview, application design and implementation, performance analysis, simulation settings, and comments for different test cases/scenario configurations.

From reader reviews:

Brian Lopez:

Here thing why this specific Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications are different and dependable to be yours. First of all reading a book is good nevertheless it depends in the content of computer which is the content is as delightful as food or not. Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications giving you information deeper including different ways, you can find any reserve out there but there is no guide that similar with Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications. It gives you thrill studying journey, its open up your personal eyes about the thing that will happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in park, café, or even in your technique home by train. Should you be having difficulties in bringing the imprinted book maybe the form of Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications in e-book can be your substitute.

Adria Jenkins:

This Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications are reliable for you who want to certainly be a successful person, why. The key reason why of this Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications can be on the list of great books you must have is definitely giving you more than just simple examining food but feed anyone with information that perhaps will shock your earlier knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed kinds. Beside that this Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications forcing you to have an enormous of experience such as rich vocabulary, giving you demo of critical thinking that we understand it useful in your day activity. So , let's have it and revel in reading.

Ernesto Harrell:

Playing with family inside a park, coming to see the coastal world or hanging out with pals is thing that usually you could have done when you have spare time, after that why you don't try point that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications, you are able to enjoy both. It is excellent combination right, you still wish to miss it? What kind of hangout type is it? Oh occur its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

Jodie Jennings:

That book can make you to feel relax. That book Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications was colorful and of course has pictures on the website. As we know that book Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications has many kinds or

category. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you and try to like reading that will.
