Analysis II: Third Edition (Texts and Readings in Mathematics)

Terence Tao

Analysis II: Third Edition (Texts and Readings in Mathematics) Terence Tao

This is part two of a two-volume book on real analysis and is intended for senior undergraduate students of mathematics who have already been exposed to calculus. The emphasis is on rigour and foundations of analysis. Beginning with the construction of the number systems and set theory, the book discusses the basics of analysis (limits, series, continuity, differentiation, Riemann integration), through to power series, several variable calculus and Fourier analysis, and then finally the Lebesgue integral. These are almost entirely set in the concrete setting of the real line and Euclidean spaces, although there is some material on abstract metric and topological spaces. The book also has appendices on mathematical logic and the decimal system. The entire text (omitting some less central topics) can be taught in two quarters of 25–30 lectures each. The course material is deeply intertwined with the exercises, as it is intended that the student actively learn the material (and practice thinking and writing rigorously) by proving several of the key results in the theory.

From reader reviews:

Mike Hendrix:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each reserve has different aim or even goal; it means that book has different type. Some people feel enjoy to spend their time and energy to read a book. These are reading whatever they get because their hobby is definitely reading a book. What about the person who don't like reading a book? Sometime, man or woman feel need book when they found difficult problem or even exercise. Well, probably you will want this Analysis II: Third Edition (Texts and Readings in Mathematics).

Michelle Seidl:

The book Analysis II: Third Edition (Texts and Readings in Mathematics) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the great thing like a book Analysis II: Third Edition (Texts and Readings in Mathematics)? Wide variety you have a different opinion about publication. But one aim that book can give many data for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or data that you take for that, you could give for each other; it is possible to share all of these. Book Analysis II: Third Edition (Texts and Readings in Mathematics) has simple shape nevertheless, you know: it has great and massive function for you. You can seem the enormous world by start and read a book. So it is very wonderful.

Marjorie Thompson:

As we know that book is vital thing to add our understanding for everything. By a publication we can know everything we would like. A book is a set of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This guide Analysis II: Third Edition (Texts and Readings in Mathematics) was filled about science. Spend your free time to add your knowledge about your science competence. Some people has different feel when they reading some sort of book. If you know how big benefit of a book, you can really feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you simply wanted.

Eunice Huynh:

That book can make you to feel relax. This particular book Analysis II: Third Edition (Texts and Readings in Mathematics) was colourful and of course has pictures on there. As we know that book Analysis II: Third Edition (Texts and Readings in Mathematics) has many kinds or type. Start from kids until teens. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that will.
