Evolutionary Criminology: Towards a Comprehensive Explanation of Crime Russil Durrant, Tony Ward

In our attempts to understand crime, researchers typically focus on proximate factors such as the psychology of offenders, their developmental history, and the social structure in which they are embedded. While these factors are important, they don't tell the whole story. *Evolutionary Criminology: Towards a Comprehensive Explanation of Crime* explores how evolutionary biology adds to our understanding of why crime is committed, by whom, and our response to norm violations. This understanding is important both for a better understanding of what precipitates crime and to guide approaches for effectively managing criminal behavior.

This book is divided into three parts. Part I reviews evolutionary biology concepts important for understanding human behavior, including crime. Part II focuses on theoretical approaches to explaining crime, including the evolution of cooperation, and the evolutionary history and function of violent crime, drug use, property offending, and white collar crime. The developmental origins of criminal behavior are described to account for the increase in offending during adolescence and early adulthood as well as to explain why some offenders are more likely to desist than others. Proximal causes of crime are examined, as well as cultural and structural processes influencing crime. Part III considers human motivation to punish norm violators and what this means for the development of a criminal justice system. This section also considers how an evolutionary approach contributes to our understanding of crime prevention and reduction. The section closes with an evolutionary approach to understanding offender rehabilitation and reintegration.

- Reviews how evolutionary findings improve our understanding of crime and punishment
- Examines motivations to offend, and to punish norm violators
- Articulates evolutionary explanations for adolescent crime increase
- Identifies how this knowledge can aid in crime prevention and reduction, and in offender rehabilitation
