Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)

Statistical Methods for Spatio-Temporal Systems presents current statistical research issues on spatio-temporal data modeling and will promote advances in research and a greater understanding between the mechanistic and the statistical modeling communities.

Contributed by leading researchers in the field, each self-contained chapter starts with an introduction of the topic and progresses to recent research results. Presenting specific examples of epidemic data of bovine tuberculosis, gastroenteric disease, and the U.K. foot-and-mouth outbreak, the first chapter uses stochastic models, such as point process models, to provide the probabilistic backbone that facilitates statistical inference from data. The next chapter discusses the critical issue of modeling random growth objects in diverse biological systems, such as bacteria colonies, tumors, and plant populations. The subsequent chapter examines data transformation tools using examples from ecology and air quality data, followed by a chapter on space-time covariance functions. The contributors then describe stochastic and statistical models that are used to generate simulated rainfall sequences for hydrological use, such as flood risk assessment. The final chapter explores Gaussian Markov random field specifications and Bayesian computational inference via Gibbs sampling and Markov chain Monte Carlo, illustrating the methods with a variety of data examples, such as temperature surfaces, dioxin concentrations, ozone concentrations, and a well-established deterministic dynamical weather model.

From reader reviews:

George Gentry:

The book untitled Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) contain a lot of information on the item. The writer explains your girlfriend idea with easy approach. The language is very clear to see all the people, so do not really worry, you can easy to read the idea. The book was published by famous author. The author will take you in the new age of literary works. You can actually read this book because you can continue reading your smart phone, or program, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice read.

Latoya Palos:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book has been rare? Why so many problem for the book? But virtually any people feel that they enjoy for reading. Some people likes studying, not only science book and also novel and Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) as well as others sources were given expertise for you. After you know how the fantastic a book, you feel wish to read more and more. Science e-book was created for teacher or students especially. Those ebooks are helping them to include their knowledge. In other case, beside science guide, any other book likes Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) to make your spare time far more colorful. Many types of book like this.

Vanessa Gilliam:

Guide is one of source of information. We can add our information from it. Not only for students and also native or citizen require book to know the upgrade information of year in order to year. As we know those books have many advantages. Beside we all add our knowledge, can bring us to around the world. Through the book Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) we can consider more advantage. Don't you to be creative people? To become creative person must love to read a book. Just choose the best book that suitable with your aim. Don't become doubt to change your life with this book Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). You can more attractive than now.

Jeffrey Cooks:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is composed or printed or descriptive from each source this filled update of news. On this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, story and comic.

You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Statistical Methods for Spatio-Temporal Systems: 107 (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) when you necessary it?
