STEM at Yale: Up Down Up: History of Science and Engineering at Yale University William Davison Glover

STEM at Yale: Up Down Up This book is a history that tracks Yale's progress in science, technology, engineering and mathematics (STEM) over two centuries. This period includes three major wars, numerous recessions, and one Great Depression. Yale University is now fully capable of meeting the enormous challenge of preparing highly intelligent students to forward mankind's quest for a better world. In my extensive research to write this book, I perused the writings and biographies of many great people. We begin with President Timothy Dwight IV and Benjamin Silliman, two Yale legends who brought science and engineering to Yale. Dwight's goal was the formation of the Yale Medical School, and Silliman was the creative force that made this happen. Silliman, in his continuing enquiry into new sciences, was also responsible for the Yale Scientific School, the first geology department in the country, and the building of the Peabody Museum. Joseph Sheffield emerges in the midst of the 19th century as the philanthropic supporter of a separate Sheffield Scientific School that grew rapidly to become the leading school of its kind in the United States. The turn of the century in 1900, combined with Yale's 200th anniversary in 1901, brought many alumni organizations into being, including the Yale Engineering Association, founded in 1914 on the eve of WWI. The Yale Aero Club and Marc Wortman's compelling book, "The Millionaires' Unit" introduced me to Trubee Davison and John Hammond, a Yale Sheffield Scientific School graduate and aviation pioneer, formed the first U.S. Navy air patrol unit during World War I. These Yale men are the acknowledged founders of the U.S. Naval Air Force, born in WWI and essential in WWII. My history ends positively. The remarkable efforts of President Richard Levin's emphasis in Science, Technology, Engineering, and Mathematics (STEM) at Yale has increased Yale's impact globally and, in the biomedical cluster businesses in the New Haven, CT region. Levin and his colleagues have brought Yale into the company of elite world universities. His response to a national call to educate our youth for the Computer Age finds Yale once again in a leadership position. Ivy league schools have slowly accepted and are now introducing reinvigorated STEM programs. In 2007, Harvard announced its first new school in seven decades: the School of Engineering and Applied Sciences. Columbia University's program, through its Fu Foundation School of Engineering and Applied Science, is the largest in the Ivy league. MIT is highly rated, but recognizes the need to build up its liberal arts programs. Our country's future as a global economic powerhouse is challenged as other nations realize that economic growth brings a better life for their people. To retain economic leadership in high technology, our best universities need new goals and major changes. In elementary and secondary school education, many countries are superior to the U.S. At the college and university level, our schools are judged superior to those of other countries. For the U.S. to retain its economic leadership, we need improved STEM education policies at all levels -- particularly in our public school system. "Rising Above the Gathering Storm," a government study that dealt with this problem, is being implemented by follow-up projects and renewed concerns within the country's top universities The best world universities must offer students a blend of humanities and the sciences to serve a fast-developing, complex world driven by new inventions. Leaders, schooled at Yale, will be among those who use these new tools to create a unified, peaceful, and better world. William Davison Glover February 2015

From reader reviews:

Cleveland Bolton:

What do you concentrate on book? It is just for students because they're still students or the item for all people in the world, what best subject for that? Only you can be answered for that query above. Every person has various personality and hobby for each and every other. Don't to be pushed someone or something that they don't want do that. You must know how great along with important the book STEM at Yale: Up Down Up: History of Science and Engineering at Yale University. All type of book is it possible to see on many methods. You can look for the internet options or other social media.

Mary Molinari:

This STEM at Yale: Up Down Up: History of Science and Engineering at Yale University is great book for you because the content that is certainly full of information for you who else always deal with world and also have to make decision every minute. This particular book reveal it details accurately using great arrange word or we can point out no rambling sentences in it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but difficult core information with attractive delivering sentences. Having STEM at Yale: Up Down Up: History of Science and Engineering at Yale University in your hand like obtaining the world in your arm, details in it is not ridiculous just one. We can say that no guide that offer you world inside ten or fifteen tiny right but this guide already do that. So , this can be good reading book. Hello Mr. and Mrs. active do you still doubt which?

Christopher Thompson:

Many people spending their period by playing outside along with friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to spend your whole day by looking at a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It ok you can have the e-book, taking everywhere you want in your Cell phone. Like STEM at Yale: Up Down Up: History of Science and Engineering at Yale University which is having the e-book version. So , try out this book? Let's see.

Michael Spicer:

Within this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you are related is just spending your time very little but quite enough to have a look at some books. Among the books in the top record in your reading list will be STEM at Yale: Up Down Up: History of Science and Engineering at Yale University. This book which can be qualified as The Hungry Hills can get you closer in getting precious person. By looking way up and review this book you can get many advantages.
