## Environmental Law Dimensions of Human Rights (Collected Courses of the Academy of European Law)

How can we guarantee a right to life or a right to health without also guaranteeing a decent environment in which to exercise these rights? It is becoming increasingly obvious that a high quality environment is key to the fundamental human rights of life and health, and associated rights such as the right to clean water, adequate housing, and food.

This book canvasses a range of law and policy issues concerning human rights and the environment. Each chapter examines an aspect of the links between environmental law and human rights in substantive and/or procedural terms, loosely falling into four themes: human rights and the environment in the context of the private sector; analysis of decisions of the European and Inter-American courts in respect of substantive and procedural aspects; human rights and the environment in the Asian region, including the issue of human displacement; and the future direction of human rights and environment law.
