Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources provides a timely review of new and unconventional techniques to manufacture high-value products based on simple biological material. The current source for most chemicals and materials is petroleum. Anticipation of its limited future availability, along with record high prices has spurred interest in alternatives that will be both sustainable and cost-effective.

In a very structured way this book begins by describing the modern technologies that form the basis for creating a bio-based industry. Next it lists the various organisms that are suitable for bioprocessing -from bacteria to algae- and it gives their unique characteristics. These first two parts set the stage for a variety of novel, experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds and the design of biofuel cells. Concludes with examples where biological, renewable resources become an important feedstock for large-scale industrial production.

Bioprocessing for Value-Added Products from Renewable Resources provides a unique perspective of the industry and the field and serves as an important guide towards the future. The book is suitable for researchers, practitioners, students, and consultants in the bioprocess and biotechnology fields.

- Reviews the principles underpinning modern industrial biotechnology
- Provides a unique collection of novel bioprocesses for a sustainable future
- Gives examples of economical use of renewable resources as feedstocks
- Suitable for both non-experts and experts in the bioproduct industry

From reader reviews:

Tom Scott:

This Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications are generally reliable for you who want to be described as a successful person, why. The reason why of this Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications can be among the great books you must have is actually giving you more than just simple examining food but feed anyone with information that possibly will shock your before knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed kinds. Beside that this Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications forcing you to have an enormous of experience like rich vocabulary, giving you tryout of critical thinking that we know it useful in your day exercise. So , let's have it and revel in reading.

Benjamin Chambers:

The reason? Because this Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications is an unordinary book that the inside of the guide waiting for you to snap it but latter it will jolt you with the secret that inside. Reading this book close to it was fantastic author who else write the book in such wonderful way makes the content inside of easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of advantages than the other book have such as help improving your expertise and your critical thinking way. So , still want to hold up having that book? If I ended up you I will go to the reserve store hurriedly.

Celina Ziolkowski:

Do you have something that you prefer such as book? The guide lovers usually prefer to decide on book like comic, brief story and the biggest some may be novel. Now, why not attempting Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications that give your entertainment preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the way for people to know world better then how they react toward the world. It can't be mentioned constantly that reading habit only for the geeky man but for all of you who wants to become success person. So , for every you who want to start reading through as your good habit, it is possible to pick Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications become your own starter.

Carmel Smith:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book has been rare? Why so many question for the book? But any kind of people feel that they enjoy for reading. Some people likes

reading through, not only science book but novel and Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications or even others sources were given expertise for you. After you know how the great a book, you feel desire to read more and more. Science reserve was created for teacher or perhaps students especially. Those ebooks are helping them to put their knowledge. In some other case, beside science book, any other book likes Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications to make your spare time more colorful. Many types of book like this.
