When Night Falls: The New Philosophy of Consciousness Terence Paul Fagan

Consciousness is a hugely important brain phenomenon, but until now it has been a very poorly understood one in conceptual terms. However, a major breakthrough in our conceptual understanding has been made, and a radical new school of philosophical thought on the subject has arisen; and what we are now discovering consciousness to be, is truly mind-blowing! WHEN NIGHT FALLS explains this new school of philosophical thought on what conscious-mind is, how it relates to the brain, to our memory, and to the external world; and also discusses its existential implications, especially concerning the issue of conscious Life-After-Death.
