After the Martian Apocalypse: Extraterrestrial Artifacts and the Case for Mars Exploration Mac Tonnies

Part exo-archaeological treatise and part cultural commentary, *After The Martian Apocalypse* is an uncompromising and groundbreaking perspective on a cosmic controversy that has perplexed scientists and astronomers for years. Here, Mac Tonnies details the latest Mars discoveries and their paradigm-toppling implications, offering strong new evidence that points to an extinct civilization on the Red Planet -- and explaining how our own survival may depend on confronting the strange and ancient truths to be found there. Facing the prospect of a previous intelligent extraterrestrial civilization, Tonnies portrays Mars as a scientific and cultural conundrum. He challenges orthodox notions of mankind's role in space -- and illuminates the imperative concept that to truly understand our own world, we must first understand our unsettling and enigmatic planetary neighbor.
